

## Common Errors in Filing Financial Statements in XBRL

Companies filing XBRL financial statements should ensure that the information filed with ACRA is accurate and complete, as the information can be publicly accessed for various purposes including by investors for investment decision making, as well as other businesses and members of the public who deal with companies.

The top common errors observed from past XBRL financial statements filed with ACRA are listed below. Companies should take note of the related guidance provided which will help to ensure the accuracy and completeness of the XBRL financial statements that they prepare and file.

Top common errors	
S/N	Description of common errors
1	<u>Incomplete/Illegible Financial Statements</u> Ensure that the 'Disclosure of complete set of financial statements' [text block] is legible and identical in content to the financial statements tabled at Annual General Meeting (AGM) / sent to shareholders (AGM FS), as the text block content is generated into PDF copy of AGM FS and made publicly available as part of the Annual Return extracts in ACRA register.
2	<u>Mismatch of share capital</u> Ensure that the share capital in XBRL FS matches the records filed in BizFile <sup>+</sup> (except for differences due to currency or changes made to share capital after financial year-end) and AGM FS.
3	<u>Incorrect mapping to XBRL</u> Map data using the relevant taxonomy elements in the templates. Use 'others' only if no related taxonomy element is found.
4	<u>Incomplete submission of XBRL data</u> Complete all templates (under the minimum requirements list) which are generated in the BizFin <sup>x</sup> preparation tool by default. Only leave a field blank when it is not applicable.
5	<u>Wrong data in XBRL FS compared to AGM FS</u> Ensure that the data in XBRL FS is accurate and consistent with the AGM FS, especially in the following: (a) Filing information: <ul style="list-style-type: none"><li>• Level of rounding (e.g. thousands, millions)</li><li>• Presentation currency (e.g. SGD, USD)</li><li>• Presentation format (e.g. type of income statement - by function / nature)</li></ul> (b) Statement of cash flows: Net cash flows from (used in) operating / investing / financing activities

	<p>(c) Income statement:</p> <ul style="list-style-type: none"> <li>• Earnings per share</li> <li>• Profit (loss) from discontinued operations (for financial statements highlights)</li> </ul>
6	<p><u>Outdated data from previous year</u></p> <p>Ensure that all data are updated and accurate for the XBRL filing for the current period, especially if past XBRL financial statements were used as reference (e.g. check if comparatives have changed in the current year FS due to restatements or reclassification).</p>

<b>S/N</b>	<b>Summary of common errors and actions which preparers may take to ensure accuracy and completeness of XBRL financial statements</b>	<b>Details and illustrative examples</b>
------------	---	--

Matching of XBRL against AGM FS

Number of shares issued should be provided in actual amounts in XBRL, regardless of the currency unit (i.e. level of rounding).

**Share Capital Details (as at 09/09/2015)**

S/No.	Currency	Class of share	No. of Shares Held	Amount of Issued Share Capital
1	SINGAPORE, DOLLARS	Ordinary Preference	40000 0	40000 0

**No. of shares to be provided in actual amounts regardless of currency unit**

Ordinary shares	Total
30 June 2015	30 June 2015

Ordinary shares	Total
30 June 2015	30 June 2015
SGD'000	SGD'000

Disclosure of detailed information about number of shares issued		
Aggregate number of shares	40,000	40,000
Total number of shares issued	40,000	40,000

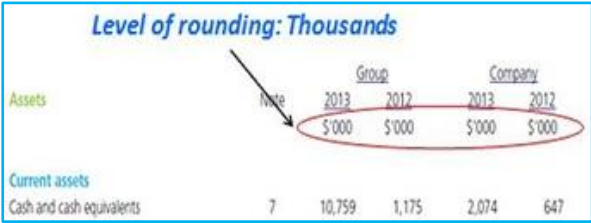

Disclosure of detailed information about amount of share capital		
Aggregate values of share capital	40	40
Share capital	40	40

Ensure that consistent data is provided in BizFile+ records, AGM FS and XBRL FS, unless due to valid reasons (such as timing and currency differences).
