

## **Release Notes for BizFin<sup>x</sup> Preparation Tool Version 2.4.0**

### **Changes from version 2.3.0**

#### **Enhancements:**

- 1) Included support for Microsoft<sup>®</sup> Office 2016 (Standard, Home and Business, Professional and Professional Plus)
- 2) Removed “Directors’ report” from guidance note for the “Full Set of Financial Statements” template. Directors’ report is not required for financial statements with financial period ending on or after 1 July 2015, under the amendments to the Companies Act
- 3) General improvements in the source code to make the tool more secure

#### **Fixes:**

- 1) Resolved a bug on the following business rules on checking group level figures:
  - Arithmetical\_002, 003, 004, 005, 006, 008, 009
  - Correlated\_043
  - CrossStatement\_014, 015
  - DerivedMandatory\_002, 004, 009, 010, 011, 012
- 2) Resolved a scenario where some XBRL files cannot be opened by the preparation tool
- 3) Resolved a bug on redundant zeros being created after the decimal place in the XBRL file, which results in genuine error Misc\_124b
- 4) Resolved an issue with business rule Misc\_041 on the count of characters in the text block in “Full Set of Financial Statements” template
